

N&TS GROUP Payment Solutions

The “Financial Systems” solutions, entirely designed and developed by N&TS GROUP IT architects and engineers, are composed of modular software applications, ready to be integrated in vertical market segments that provide or employ payment or collection services. Enterprises and Financial institutions leverage the flexibility and scalability to create systems that match their specific needs and solve the problem of siloed information stored in legacy systems.

N&TS GROUP “Financial Systems” cover the entire scope of the payment process to deliver a solution that integrates channel management and card management.

From NFC payments to cash management going through POS Management, eCommerce and Fraud Prevention, N&TS GROUP applications are at the

heart of innovative deployments in multiple industries such as retail, utilities, transportation, infrastructure, telco, media, oil, banking and finance.

All N&TS GROUP “Financial Systems” solutions are designed to deliver top-level performance, granting integrated business continuity and disaster recovery, with limited infrastructural requirements and total cost of ownership. The solutions are Java-based and have an innovative, modular application architecture.

Through dedicated business divisions, N&TS GROUP also provides hosted and managed solutions that entirely remove the burden of infrastructure and compliance, allowing Enterprises and Financial Institutions to focus on their core business.

N&TS GROUP

N&TS GROUP is a leader in the payment processing industry thanks to more than 20 years of experience, with a firm commitment to security and compliance.

Today N&TS GROUP is actively managing transactions in card-present and card-not-present environments, in multiple currencies, and in both international credit and local debit schemes.

N&TS GROUP is the trusted partner of Enterprises and Financial Institutions which need to process multi-channel transactions with simplicity and security. N&TS GROUP holds a PCI LEVEL 1 certification and was the first provider in the world to certify its technology for Point-to-Point Encryption (P2PE). Our software industry process is compliant with the ISO 9001:2015 standards, while for information security management we are certified according to the ISO/IEC 27001:2013 standard.
